Tobacco Crop

One of the biggest tobacco crops in the history of Hancock county was cured out in good color and high quality. This was due, according to County Agent Chas. Hoff, to the use of green manure crops of winter legumes, growing of disease-resistant varieties, and leaving the tobacco in the field until partly cured. Best results were obtained from Ky. 33 or Ky. 17 was used, and Hoff said most farmers will grow one or both of the varieties next year in order to avoid disease loss.

Recipe Of The Week

For full flavor and greater tenderness as well as more servings, most meat should be cooked long and slowly, advise food authorities at the College of Agriculture and Home Economics, University of Kentucky. Even a tough cut of beef, such as the chuck, will be a favorite prepared in this way.

Savory Pot Roast
3 pounds of beef chuck
1/4 cup flour
4 tablespoons fat
1 teaspoon salt
1-8 teaspoon pepper
1 cup water
6 potatoes
6 carrots
6 onions
6 turnips

Dredge the meat well in flour. Melt the fat in a heavy kettle and brown the meat well on each side, seasoning as the meat is turned. Add the water. Cover and cook slowly for two hours, then add prepared whole vegetables and continue cooking for one hour. Remove meat and vegetables and make gravy.

Veterans' News

Documentary evidence of dependency should be submitted to Veterans Administration immediately by veterans with disability ratings of 60 percent or more in order that they may qualify for increased compensation payments.

Public Law 877 of the 80th Congress provides additional allowances for such disabled veterans who have a wife, children or dependent parents. The married veteran may receive up to \$21 extra, with added amounts for additional dependents.

Veterans whose dependents are recorded in their VA claims folders as of September 1, 1948, will have until December 1 to file the evidence. These awards will be retroactive to September 1, the effective date of the law. Otherwise, the effective date of the increase will be the date of receipt of the evidence.

As evidence of a wife and children, a veteran may submit certified copies of public or church records. If for any reason these are not available, he should submit the best evidence at hand, such as sworn statements of responsible persons. For parents proof of dependency in the form of sworn statements as to income and property ownership are required.

The first G. I. Bill deadline is not far away, Veterans Administration said today.

Veterans discharged before July 25, 1947, have only until July 25, 1949, to apply for readjustment allowances for unemployment and self-employment.

G. I.'s discharged after the 1947 date have until two years after discharge.

More Reservoirs On Kentucky Land

Since 1944, bulldozers have been used to dig an average of 6,500 farm reservoirs a year in Kentucky, according to Earl G. Welch, farm engineer at the College of Agriculture and Home Economics, University of Kentucky. There are around 300 customs operators of bulldozers in the state, he said.

Welch said the first engineered farm reservoir in Kentucky was made in Powell county in 1924. About 200 reservoir demonstrations were established by the extension division of the college up to 1938.

In 1939, customs operators using bulldozers began planning and building reservoirs as a business. According to annual reports of county agents, a total of 46,073 reservoirs have been made with an average shore-line of 471 feet. They vary in size from small farm ponds to 30 acres, and one recently was made

Canes For Soldiers

London — AP — "Spare the rod, spoil the soldier", the British Army believes—and parents of cadets agree. The war office says that it asks permission of parents of all boys in military schools to cane their children "if the occasion should arise". Seventy-five percent of the parents approve of the canings.

"The old fashioned punishment of caning is better than such punishments as keeping the boys in to do extra work", a war office spokesman explained.

Good rubies and emeralds of four carats or more are usually more valuable than diamonds of the same size.

In Grayson county covering 50 acres.

The total area of farm reservoirs constructed by customs operators in Kentucky since 1939 covers 18,429 acres, with a shoreline totaling 498 miles, Welch said.

Piggy-Back Governor

Cheyenne, Wyo. — AP — Gov. Lester C. Hunt, attending a rodeo, noticed a pretty girl ruefully eyeing a stretch of muddy track she had to cross. He approached her and said a few words, to which the girl, Marjane Albright, nodded eagerly. So the governor carried her piggy-back across the mud.

Can Black-Draught Help That Dull, Dopey Feeling?

Yes, Black-Draught may help that dull, dopey feeling if the only reason you feel that way is because of constipation. Black-Draught, the friendly laxative, is usually prompt and thorough when taken as directed. It costs only a penny or less a dose. That's why it has been a best-seller with four generations. If you are troubled with such symptoms as loss of appetite, headache, upset stomach, flatulence, physical fatigue, sleeplessness, mental haziness, bad breath — and if these symptoms are due only to constipation — then see what Black-Draught may do for you. Wickliffe Bridge To Be Free Nov. 11

Will Be 9th Interstate Span To Lift Tolls Since 1941

(By Associated Press) Frankfort — The \$1,890,000 Ohio River bridge between Wickliffe and Cairo, Ill., will be opened to free traffic at ceremonies at Cairo November 11.

Ray Williams, chairman of the Cairo Bridge Commission, said Cairo and its civic organizations are planning to celebrate freeing of the toll bridge. It was opened to traffic November 11, 1838.

It will be the ninth Kentucky interstate toll bridge to be freed since 1941. The State-owned Central Bridge over the Ohio between Newport and Cincinnati still collects tolls as do four other Ohio River bridges, at Fullerton, Covington, Owensboro, and Louisville. The Owensboro bridge is operated by a bridge commission. The other three are privately operated.

The Cairo Bridge, five miles long, including its approaches, was constructed under supervision of the Cairo Bridge Commission with financial aid from

Illinois, Kentucky, and the U. S. Public Works Administration. It is on U. S. 54, 60, and 62. Kentucky provided \$483,429, which was applied to grading and surfacing on the Kentucky side. The P. W. A. grant amounted to \$654,545.

Ohio still has more than 500 covered bridges. Rubies range in color from rose to deep purple.

It is not necessary to flour roast, but it may be rubbed with a cut clove of garlic or with little dry mustard for good flavor.

Soften a small cake of cream cheese at room temperature and cream with a cup of confectioner's sugar; flavor with vanilla and thin with strong black coffee. Use to frost devil's food cake.

OGDEN METHODIST

Beginning Monday, Nov. 8, women of Ogden Memorial Church will sponsor a neighborhood cottage prayer meeting. The Christian womanhood of Princeton, regardless of church affiliation, is invited to join these informal prayer groups. It is also announced that the M.Y.F. meets every Sunday night at 6 o'clock. Last Sunday night Miss Barbara Nall conducted an interesting discussion on the subject, "Popularity". Barbara Jones will be the leader for next Sunday night. All young people are cordially invited.

FIRST CHRISTIAN

Consecration Sunday will be celebrated Sunday at a combined morning service of the Church School and the congregation. One hundred percent of resident members of the Church and Church School in attendance for this great service is one of the goals of the day. Thirty minutes of special music will open the services. The Ordinance of the Lord's Supper will be observed after the sermon and commitment of pledges to the support of the budget for the remaining eight months of the church year. Visitors are welcome to attend and share in the service in any way they feel led. The C.Y.F. and evening worship will be held at six and seven o'clock consecutively.

FIRST CHRISTIAN

Tom W. Collins, Pastor. November 7 is to be Consecration Sunday at this church. One hundred percent of the active enrolment in attendance at the morning hour is the goal. The church school and morning worship will be a combined service, beginning at 10 o'clock. All persons arriving before the opening hour will be presented a white lapel cross. All teachers and class officers are to complete plans this Sunday for the coming victorious event. A cordial invitation is extended to all those without a church home to come and worship with us. Release Of Ballplayers Recalls Days Of Glory

By Frank Eck
(AP Newsfeatures Sports Editor)

New York—Baseball's annual fall housecleaning is in full swing. It's always interesting to see changes made in major league player personnel but when some of the game's outstanding stars pass over the hill it's a bit hard to take.

Since the season closed a number of former standouts have been given their release as players. Among those who have passed from the scene one player stands out. He is Terry Moore, one of the greatest center fielders in National League history. Moore will be a coach with the St. Louis Cardinals next season.

It seems like only yesterday that he was making glittering catches in a World Series against the Yankees. In the 1942 Series he made 15 putouts, many of them sensational grabs. In the 1946 classic with the Red Sox he had 17 putouts.

But the last two years Terry's 36-year-old legs lost their spryness. He hit only .227 this year against a lifetime average of .283. Moore realized he was at the end of the trail when he misjudged a fly ball in Brooklyn. It was his second such offense in 1,300 League games. The game loses a great competitor in Moore.

Among other veterans who have been released as players are George McQuinn by the Yankees, Rudy York by the Athletics, Manager Bucky Walters by the Reds, Babe Young by the Cards and Arky Vaughn by Brooklyn.

McQuinn, an 11-year veteran in the American League, hit only .248 this year. He batted .304 in 1947 but when he reached his 37th year he just didn't have it. In the 1944 all-St. Louis World Series he hit .438 for the Browns.

York, who sent from Detroit to the Sox, to White Sox to Athletics within the last three years, is another former World Series star. The big Indian slugger from Alabama hit 280 homers. As a first baseman in the '46 Series against the Cards York accounted for two of the

DID NOTHING WRONG, SHE SAYS—Lenore Shanhouse, 19, (above), who was found in Montreal after disappearing from the campus of Smith College at Northampton, Mass., relaxes aboard an airplane which stopped at Syracuse, N. three Red Sox victories in a losing cause. He won the opening game with a 10th inning home run to beat Howie Pollet, 3-2. He also won the third game when he homered with two on in the first inning to beat Murrey Dickson, 4-0.

In York's greatest year — 1940 — he hit 33 homers, batted .316 and drove in 134 runs for the Tigers. Some team may yet use his big bat even though Rudy is past his peak at 35.

Walters, one of the most popular players to ever wear a Cincinnati uniform, has called it quits as a pitcher. Bucky, of course, may change his mind. He needed only two wins at the start of the season to crash the elite 200 circle. He failed in his few starts this year.

The former third baseman, a three-time 20-game winner with the Reds, reached his peak with a pair of victories over the Tigers in the 1940 Series. After a great season in 1944 when he

Farm Pays For Itself Since '32

When 350 farmers and other persons attended a recent meeting at A. C. Glasscock's place in Marion county they saw a 293-acre farm which had been made to pay for itself since 1932.

Mr. Glasscock began farming with 62 acres, for which he borrowed the entire purchase price of \$5,000. He concentrated his efforts on eight milk cows, 20 ewes, 15 hogs, 200 hens and four to six acres of tobacco, according to Marion County Agent G. H. Karnes' review of his operations.

Eighty acres were added in 1942. Beef cattle were raised on the cow-and-calf plan, sheep increased to 60 ewes, hogs to 30 to 40 head and chickens to 300 to 400 hens.

In 1945, 151 acres were added, making the farm 293 acres. The beef herd was increased to 25 cows, with 20 steers or heifers fed out each year. Also, 200 hogs and 150 lambs were fattened. About 400 hens were kept.

Mr. Karnes notes how the original 62 acres and each added tract of land were limed and phosphated. Tobacco yields moved up from 887 pounds an acre in 1933 to 2,182 pounds last year, and corn yields from 45 to 50 bushels to 100 bushels.

The visitors saw 5,000 pounds of primed tobacco, good pastures and big corn. They also saw how the land had been terraced. They saw a flock of chickens raised on clean ground. Other things they saw: A modern home, with running water, up-to-date kitchen, electric water heater, refrigerator and deep freeze; a good orchard, a productive garden, and two ponds for stock water and fishing.

Homemakers Study House Furnishings

Mrs. Ada G. Carter, home demonstration agent, recounts some of the accomplishments of homemakers in Marion county as a result of a year's study of home furnishings in homemakers clubs.

Following a lesson on color harmony, pattern and color were improved in 289 rooms. One hundred and seventy-one floors were refinished and 64 new ones furnished after a study of floor treatment. Wall finishes were changed in 302 rooms and woodwork was redone in 225 rooms. Two hundred and twenty-six pairs of glass curtains and 67 pairs of draperies were made according to approved methods. The length of 109 pairs of draperies and curtains was changed.

One of the most popular discussions was that of picture selection, framing and hanging. As a result, 109 were reframed, 124 new pictures were hung, 64 were reconditioned and 122 removed.

Mrs. Elmer Dalton, county home furnishings leader, put the information to good use, said Mrs. Carter, when she had floors sanded and refinished and woodwork painted white. Then she selected wallpaper, draperies and slipcovers according to color principles learned in her club work.

Male Tax vs. Poll Tax

Louisville, Colo. — AP — Although Colorado has no poll tax, male citizens in Louisville, a northern Colorado town of 2,700, have to pony up to \$3 tax every year. Either that or do four hours' work for the city at 75 cents an hour.

The tax has been in effect since 1882 and catches every male between 21 and 60 except war veterans and city firemen. "It's very handy when it comes time to clean out the curbs and gutters in the spring," said John A. Dionigini, city clerk and recorder. "Of course, some people mistake it for a regular poll tax and think it applies to voting." But it doesn't. If you're a Louisville male, you pay it whether you want to vote or not.

Produces Good Apples

For an outlay of \$7.49, Arthur Keith of Wiborg, McCreary county, harvested and sold 70 bushels of fine apples after a worthless crop a year ago, he told George D. Corder, county agent. Mr. Wiborg paid \$1.49 for an army surplus spray last spring and \$6 for spray material. He spent nine hours spraying his apple trees three times.

To Stay By Farm

After his county agent helped him work out a long-time program, Howard Vaughn, a young Green county farmer, decided to remain on the home farm where

he had been living with his father and grandmother. At the suggestion of County Agent John H. Ewing, Jr., he arranged to take the place over and is now setting about to improve the farm and make home for his family. He will spread lime about a fourth of the and put phosphate on Try a Leader Class

All-New Fireball Engine — Yours without Delay

WINTER'S the time when an old engine really bogs down — when weak sparks fail to fire a charge of gas — when worn rings and compression leaks get in their dirty work.

But we've got the answer, right here waiting for you. We've got a brand-new Buick Fireball engine that will fit right in your prewar car — any Buick built since 1937.

In 12 to 15 hours — at a cost only slightly above a thorough overhaul — we can take the weary engine out of your Buick and put in a brand-new power plant.

These engines are built on the same assembly line as the engines in 1948 Buicks. They're you all the 1948 engine features. They're new — new pistons, rings, pins. New valves and carburetor. New spark plugs, new distributor. Everything listed in the panel shown is in this "power package."

Best of all, there's no waiting. Engine out of the factory is running ahead of car production — so your 1948 Fireball engine is waiting for you right now.

Steal a march on winter today. Come in and get all the facts — including our easy-pay terms.

Garden Debris Made Into Humus

By John S. Gardner

The vegetables now are killed, except possibly Chinese cabbage, cabbage, greens and turnips, which ultimately the frost or a freeze will destroy, except that it is hoped that the cabbage and turnips will have been stored.

Two vegetables improved by freezing in the garden are parsnips and salsify, and to a lesser extent, carrots. Except for these, before long the garden will be completely bare, other than for the graveyard of skeletons of vines and stalks, a depressing sight.

Rather than look at that sort of thing all winter, the garden should be cleared off and the old stalks and vines piled together to rot down into humus, enough at least to spread over the flower garden or for making potting soil for house plants.

Left in the garden all winter, this material will have to be removed before plowing or spading can be done, to be burned to get out of the way, which means material which is really valuable and scarce will be destroyed.

News From The Past

News representing lives, hopes, dreams and ambitions of those who made up the populace of Princeton and Caldwell county almost 40 years ago recorded nowhere but in the yellowed files of Twice-A-Week Leader of those years will be published as a regular Leader feature. The articles are reproduced just as the Princeton reporters, shortly after the turn of the century, wrote them.

May 22, 1906. Mrs. Dr. J. A. Akin left Sunday to be present at the graduation of her daughter, Miss Melville Akin, a pupil of the Russellville Female College. The graduating exercises took place this morning and as soon as other exercises of the college are over Mrs. Akin and Miss Melville will return home.

Sport Books Make Good Fireside Reading

One of the most interesting books to reach the sports desk this fall is "Sport's Golden Age" (Harper & Brothers, \$3.95). The book, edited by Allison Danzig and Peter Brandwein, includes chapters on many sports and gives a first-hand closeup of the fabulous twenties.

"My Greatest Day in Football" (A. S. Barnes and Co. \$3 by Murray Goodman and Leonard Lewin) is another unusual tome. It includes brief chapters by Frank Leahy, Lou Little, Earl Blaik—three of the games top coaches—Sid Luckman, Army's Doc Blanchard and Glenn Davis, Knute Rockne, Bob Waterfield and many others.

Other football books that will help pass away the winter beside a fireplace are "Army vs Notre Dame—The Big Game" by Jim Beach and Daniel Moore (Random House, \$3) and Gridiron Grinders by Tim Cohane. Lou Boudreau, manager of the world champion Cleveland Indians, has come up with "Good Infield Play" (Ziff-Davis, \$1.25) and Bowler Ned Day has written "How to Bowl" (Halcyon House, \$2). Day's "How to Do" contains 14 illustrations on bowling etiquette.

JOHN DEERE DEALER to ENTERTAIN FARMERS and THEIR FAMILIES

"The Sugar Plum Tree"

starring BILLIE BURKE and DON WILSON, is feature picture in BIG JOHN DEERE DAY SHOW

Billie Burke and Don Wilson, popular movie and radio stars, head the all-Hollywood cast in "The Sugar Plum Tree," feature picture to be shown in the Capitol Theater on Thursday, Nov. 18 at 9 a. m. The movie headlines the free John Deere Day entertainment and educational program for farmers and their families which is being sponsored by Robinson Implement Co.

"The Sugar Plum Tree" is a rollicking comedy about two young people who have never been on a farm, and what they do when they receive one as a gift. You'll get a kick out of sober, bookish C. St. John Smith, on the farm, as played by Kirby Grant. Pretty Linda Johnson plays Matilda Thorne, the other "greenhorn" on the farm. Lee "Lasses" White will give you many a chuckle as the eccentric hired man. "The Sugar Plum Tree" will prove Grade "A" entertainment for the entire family.

In addition to "The Sugar Plum Tree," several other new all-talking pictures will be shown. They include "Early Does It"—a snappy picture with tips on timely care of farm machinery... "Greener Pastures"—an educational full-color picture on pasture care and renovation... "Guardians of the Harvest"—a full-color film of combines in action in various crops throughout the country... and "Gateway to Bigger Feeding Profits"—a movie that every feeder and dairyman will want to see.

According to Mr. Robinson, admission to the John Deere Day Program is by ticket only. Any farmer who has not received his tickets or needs more can get them free at Robinson Implement Co. before the day of the show.

Cooper Advises Farmers To Take Care Of Finances

Says Inflation Creates Uncertainty In Property Values, Prices And Income

(By Thomas P. Cooper, Dean and Director, College of Agriculture and Home Economics, University of Kentucky, Lexington, Kentucky)

Kentucky farmers have never had greater need than now to take stock of their financial program and bring their fixed and liquid investments into good balance to meet the un-

RELIEF AT LAST For Your COUGH

Creomulsion relieves promptly because it goes right to the seat of the trouble to help loosen and expel germ laden phlegm and aid nature to soothe and heal raw, tender, inflamed bronchial mucous membranes. Too Smart To Fight

Berlin — AP — The Germans are being told that the Russians are smarter than Hitler — too smart to start a war with the west.

This is the theme of a pamphlet put out by American Military Government. It is one of a series distributed in Germany and described as "reliable interpretation" of the world situation. The pamphlet is called "Russia—The Story of a Great Bluff". It was written by Franz Borkenau, former professor of modern history at the University of Marburg in the U. S. zone of Germany.

certain days to come. Farming is a hazardous business at best, subject to unexpected losses from drought, flood, and pestilence—but overshadowing these natural hazards just now is the great inflation through which we are passing. Inflation creates more uncertainty in property values, income and prices than Kentucky farmers have previously faced.

Success of farm families in arranging their finances now will greatly affect their farming and the well-being of the family in the years ahead. Fortunately, farmers are now in good position to take the protective

steps needed. Markets for all classes of farm property are active, and income and profits from farming are the largest in modern times.

In bringing their financial program into good balance, farmers may consider not only their fixed investments (in land, improvements, equipment, and livestock), but their liquid investments also—those which can readily be turned into cash to meet some unexpected emergency. For this purpose, U. S. Savings Bonds are unexcelled—A safe and highly liquid investment providing a reasonable interest return.

The owner of U. S. Savings Bonds has a ready and unfailing source of funds when emergency arises. Farmers need liquid assets in bonds, savings, and insurance to protect their fixed investments in property and operating capital and to enable the farm family to meet adversities without the fear of having to sacrifice essential items in family living.

No simple formula for farm investments can be offered that will apply equally to all farms. Variations in farming and family responsibilities are too great. The variety of Government

meeting Wednesday night conducted by Mr. Orman Jewell and a good many things were given Mr. and Mrs. Guy Jewell

Bonds is such however, that they offer safe investments suited to the needs of various situations. The amount of U. S. Savings Bonds any farm family should purchase depends on its individual circumstances.

In addition to providing a cushion against disaster, U. S. Savings Bonds also provide other valuable investment opportunities for farmers. They offer a convenient and sound means of systematic saving for investment and income, for meeting an obligation, or for accumulating savings for other specific purposes.

During recent years, when many items for farm and family use were scarce, U. S. Savings Bonds provided an excellent type of investment of savings until the scarce articles were available. Although this particular need is now passing, the wide variety of bonds with different terms of purchase and maturity offer many investment opportunities which appeal to thrifty farm people.

4-H Club Work Helps In College
Miss Eloise Lorch of Anchorage, Jefferson county, made use of her 4-H Club project work to earn money for a considerable part of her expenses at the University of Kentucky, where she is enrolled as a freshman in the College of Agriculture and Home Economics.
Miss Lorch was awarded a \$200 scholarship by the Farm Underwriters Association for writing an essay on ways which she, with the cooperation of her parents, eliminated fire hazards in their home. Another \$200 was earned by Miss Lorch when she operated a play-school for small children at her home for a period of five weeks. Then, when not otherwise engaged, she did baby sitting.
Style revue champion in Jefferson county and a blue ribbon winner at 4-H Week at Lexington, this 4-H'er saved on her college clothing budget by making all of her wardrobe with the exception of a winter coat. That she appreciates the finer techniques of sewing was seen when she won the Jefferson county clothing judging contest, to be followed later with a blue ribbon at 4-H Week.
Although Miss Lorch has a fine foundation for a home economics career, she is as yet undecided in which of its many phases she will specialize.

Good Management Pays In Dairying
An Eastern Kentucky dairyman reported a production gain of 12 percent in two years due to such improvements as:
Keeping breeding records and conditioning cows during a six-week to two-month dry period.
Regular milking hours and feeding habits.
Improvements on water supply.
Keeping cows in the barn on cold, rough days.
Keeping the barn warm but well ventilated.
Providing sufficient bedding to keep cows comfortable.
Dehorning cows housed in a rest barn.
Dairy specialists at the College of Agriculture and Home Economics, University of Kentucky, said:
"Many cases, such as this, lead one to believe that good management, plus improved pasture and better legume hay, could make the average dairy cow in Kentucky produce 220 pounds of butterfat a year instead of 170 pounds. This would mean an increase of about 40 percent in net income from milk."

Scott Women Grew Acres Of Gardens
Had all the gardens of Scott county homemakers been placed together last summer, they would have made a garden patch more than 26 acres in size, according to Mrs. D. W. Houston, project chairman. From it, more than 5,000 quarts of food were canned.
Homemakers in that county canned also 5,000 quarts of fruit and preserves and placed 813 pounds of fruit in freezer lockers. More than 15,000 pounds of meat were cured, 6,000 pounds frozen and 1,065 quarts canned.

Butler FFA To Collect Scrap

Drive Begins Today On All Farms In County

As Group Tries For Prize

Butler High School Chapter, Future Farmers of America, will begin collecting scrap metal today from the communities and farms of Caldwell county, James D. Maddox, instructor of agriculture at Butler, announced.

Purpose of the drive, Mr. Maddox said, is to relieve the critical shortage of scrap metal needed to make steel. Because a check-up showed much scrap metal had accumulated on farms since the war-time drives, the Midwestern Scrap Metal Committee has initiated this campaign to get the scrap metal, Mr. Maddox pointed out.

The campaign has the endorsement of Charles F. Sawyer, secretary of commerce, Charles Brannan, secretary of agriculture and Maurice Tobin, secretary of labor. Prizes are being offered to the winning FFA chapter or 4-H group in this district by radio station WLW, Cincinnati. To both the 4-H clubs and FFA chapters in the State turning in the greatest per capita amount of scrap

KU Postpones Rate Increase Application Affecting Industries

An unexpected reduction in the cost of coal together with other favorable operating factors has enabled Kentucky Utilities Company to postpone application of a fuel-cost clause to electric contracts with industrial and commercial customers, R. S. Gregory, K. U. district manager here, said this week.

The Public Service Commission last week granted K. U.'s request to defer addition of the clause which the company had sought earlier.

Mr. Gregory said the company may be forced to seek a fuel clause later, if operating factors rise or revenues fall.

He listed other favorable factors as economies resulting from around-the-clock operation of the recently installed second generator at the Tyrone power plant, and improved load conditions.

There will be awarded 14 prizes ranging from \$100 to \$20, Mr. Maddox said.

The campaign will last ten days, through November 14. FFA members will call at all farms, and anyone with scrap metal on their place is urged to contact Butler Chapter FFA, Mr. Maddox said.

TVA To Ask Bids On Bridge Over Ky. Dam Nov. 12

Will Link New US 62 Route, Paducah To Kuttawa; Will Aid Park Project

Bids for construction of a vehicular bridge over Kentucky Dam are to be received by the Tennessee Valley Authority November 12, Henry Ward, State commissioner of conservation, said here last night he has been informed by TVA officials.

The bridge will be a link in the new route of U. S. Highway 62, which will carry the highway from Paducah to Kuttawa via Kentucky Dam.

A section of a new highway between the dam and Kuttawa has been completed, and the State Department of Highways recently awarded a contract for completion of that route.

Ward also reported the State Highway Department is pushing ahead plans for early construction of a bridge over Cumberland River between Kentucky Dam and Kuttawa, provided cost of the bridge can be financed through issuance of revenue bonds.

"Plans are being considered for building of a new highway between Kentucky Dam and Paducah as the route of U. S. 62, but odds are this project will be delayed until completion of the route from the dam to Kuttawa," Ward said.

"Building of this new highway will mean much to the full development of the Kentucky Dam State Park," the commissioner added. "We have been gratified at the progress which has been made there, and at public support being received, but more patronage will be needed to bring this park to its full development. We now have facilities to take care of 175 persons at the park each night, either in lodges or cottages, and the dining room is operating efficient now."

Second Group Of Inductees Called

Go To Owensboro Nov. 10; William J. Batten Named Chairman

The second group of inductees from Draft Board No. 9 will go to Owensboro for pre-induction examinations Wednesday, Nov. 10, it was announced this week by Henry Averick, chief clerk. The board serves three counties, Caldwell, Crittenden and Lyon.

Reports from the first group, who underwent physical examinations and others tests at the induction center October 26, have not been received by the local board, Mr. Averick said. The State office still forbids the publication of details, names or number concerning men going to the induction center, Mr. Averick pointed out.

William J. Batten, Caldwell representative on the draft board, was appointed chairman at the regular meeting of the board Friday. Other members of the board include R. S. Mason, representing Lyon county, and Robert Rodgers, Crittenden county.

First National Bank's

SIXTH ANNUAL CORN SHOW

Because of the widespread interest and cooperation of the farmers in previous years, we plan on holding another corn display and contest in the bank's lobby this year, with

Ten Prizes (\$5.00; 4.00; 3.00; 2.00; 1.00)

for the best yellow and the same for the best white corn.

Each entry must consist of three ears. They should be arranged and tied by the farmer. If you raise more than one variety of corn (either hybrid, open pollinated, white and yellow, etc.) you may make an entry of each.

SPECIAL

3.00 For The Longest Single Ear!

Closing date for entries: November 26. Corn will be judged that night by Mr. R. A. Mabry, tagged and displayed all of the following week. Corn will be sold Dec. 4th, and the proceeds given to the Caldwell County Memorial Hospital.

We are glad at all times to display any unusual farm products, such as pumpkins, apples or stalks of corn, etc. We have several in our lobby at this time. If you have anything of this nature, we will be delighted to place it on display.
